SAMLEIKIN ONBOARDING

SAMLEIKIN ONBOARDING

- To learn about Samleikin, SAML and our Demo Service Provider (SP) try our implementation procedure and technical guide in the link below
<https://bitbucket.org/klintra-ft/sp-demo>
- Set up preliminary test environment to use with the Test 1 IDP environment (optional).
- If you wish your own DNS name, this must be registered in the Test 1 environment.
- Prepare the set up of/adjustment of your backend environment, so that it is suited for the Samleikin login mechanism.

SAMLEIKIN ONBOARDING

- Register metadata about the SP in our **metadata form**
 - TF approves metadata
- Install Schibollet client (on Staging server) according to **technical guide**
- Read and fill out our **Test procedure, testplan and report template**
- Enrollment of SP into the metadata federation of Samleikin
 - **Key exchange ceremony**
 - **Sign metadata**
 - **Deploy metadata**
- Test according to testplan, and report
 - Prepare testphone and testusers
 - Test
 - TF approves testresult

SAMLEIKIN ONBOARDING

- Register metadata about the SP in our **metadata form**
 - TF approves metadata
- Install Schibollet client (on Prod server) from the **technical guide**
- Enrollment of SP into the metadata federation of Samleikin
 - **Key exchange, full ceremony** (private and public)
 - **Sign metadata**
 - **Deploy metadata**

SAMLEIKIN ONBOARDING

- Try out the system, logon etc. No formal requirements for testapproval from TF
- Set up graphical interface (login button, colours, size etc. TF provides **graphical guide**)
- Coordinate GO LIVE date
